Claim 59 (Present Cancelled)

Claim 60 (Present Cancelled)

Claim 61 (Present Cancelled)

Claim 62 (Present Cancelled)

Claim 63 (Present Cancelled)

Claim 64. (New Added) A pharmaceutical composition in the treatment of one or more ailments selected from the group comprising hypersensitivity reaction diseases, allergies, pain, influenza, colds, inflammation, virus infections, and insect bites; by lowering humoral pH wherein said pharmaceutical composition comprises by weight:

- 0.06-100 wt% of edible acid and/or its acidic salts of sodium or potassium, and pharmaceutical acceptable carrier;

said edible acid is phosphoric acid;

said pharmaceutical acceptable carrier selected from the group comprising a binder, an inert, a diluting agent, an agent, a thickener, a softener, a dispersing agent, an emulsifier, a preservative, a lubricant, a sweetener, a perfume and a pigment.

Claim 65. (Previously Presented) A pharmaceutical composition according to claim 1 wherein said composition selected from the group comprising an oral agent, non-oral agent and topical usage.

Claim 66. (Previously Presented) A pharmaceutical composition according to claim 1 wherein said composition is for oral administration and is selected from the group comprising a capsule, a tablet, flakes, a powder, a pill, lozenges, a syrup, a solution and a suspension.

Claim 67. (Previously Presented) A pharmaceutical composition according to claim 1 wherein said composition is an oral agent, compounding with compounds selected from group comprising a binder agent, a densifier, a softener, a disperser, an emulsifier, a preservative, a lubricating agent, an enzyme, a sweetener, a perfume agent, a pigment, an herb, another nutrient, and their compounds.

Claim 68. (Previously Presented) A pharmaceutical composition according to claim 1 wherein said composition is injection selected from the group comprising intradermal injection, muscles injection, venous injection, hypodermic injection, the joint lubricating liquid, intestine and in tumor.

Claim 69. (Previously Presented) A pharmaceutical composition according to claim 1 wherein said composition is none oral agents selected from the group comprising a liquid, a paste, an aero sol, a spray and a skin absorption; in which the solvent is selected from the group comprising water and alcohol.

Claim 70. (Previously Presented) A pharmaceutical composition according to claim 1 wherein said composition is an health care food.

Claim 71. (Previously Presented) A pharmaceutical composition according to claim 71 wherein said health care food is in a form selected from the group comprising a juice, a wine, a soft drink, a carbonated drink, a none carbonated drink, a tea, a sports drink, a functional drink, a coffee, a cola, a sarsaparilla, and a diary product.

Claim 72. (Previously Presented) According to claim 71 wherein said health care food containing 0.06.about.10(wt/wt%) of edible acid.

Claim 73. (Previously Presented) A pharmaceutical composition according to claim 1 wherein said composition is an agent for lowering allergy risk of food containing active protein which causes allergy.

Claim 74. (Previously Presented) According to claim 73 wherein said agent for lowering allergy risk of food selected from the group comprising succinic acid, fumaric acid, maleic acid, malic acid, tartaric acid, citric acid, lactic acid, α -hydroxy octanoic acid, gluconolactone, glycolic acid, acetic acid, and propionic acid.

Claim 75. (Previously Presented) According to claim 73 Or claim 74 wherein said food is treated with 0.06.about.10(wt/wt%) edible acid.

Claim 76. (Previously Presented) Method according to claim 75.

Claim 77. (Previously Presented) A pharmaceutical composition according to claim 1 wherein said composition is an agent for lowering allergy risk for cloth or grove containing active protein which causes allergy.

Claim 78. (Previously Presented) According to claim 77 wherein said agent for lowering allergy risk of cloth or grove selected from the group comprising succinic acid, fumaric acid, maleic acid, malic acid, tartaric acid, citric acid, lactic acid, α -hydroxy octanoic acid, gluconolactone, glycolic acid, acetic acid, and propionic acid.

Claim 79. (Previously Presented) According to claim 77 or claim 78 wherein said cloth or grove is treated with 0.06.about.10(wt/wt%) edible acid.

- Claim 80. (Previously Presented)** **Method according to claim 79.**
- Claim 81. (New Added)** **The product produced according to claim 76 or claim 80.**
- Claim 82. (New Added)** **A pharmaceutical composition according to claim 1 for animals.**
- Claim 83. (New Added)** **A pharmaceutical composition according to claim 1 for mammal animals.**
- Claim 84. (New Added)** **A pharmaceutical composition according to claim 1 for human.**
